DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - A. Claims 1-20 and 23-28, drawn to method for determining content, classified in class 705, subclass 14.
 - B. Claims 21, 22 and 29, drawn to method for determining navigational options, classified in class 725, subclass 37.
2. Inventions A and B are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has utility separate from that of inventions B such as determining content. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, search, or patentability requirements, restriction for examination purposes as indicated is proper.
4. A telephone call was made to James M. Denaro, Esq., on 3 May 2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
